PROFESSIONAL SUMMARY

Software Engineer with about 1.5 years at Greenway Health (including internship), building C#/.NET backend services and REST APIs for a production healthcare EHR. Delivered a provider notification and task feature from PRD to release, and improved editor reliability and page performance. Experienced in data migration, automated testing, code quality, AWS operational workflows, and production support.

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Greenway Health

Aug 2025 – Present

Bengaluru, India | C#, .NET, REST APIs, xUnit, SonarQube, AWS

- Developed and maintained **C#/.NET components and REST APIs** for production healthcare EHR workflows, working with product, QA, and engineering teammates from requirements through release.
- Contributed to **data migration, validation, automated testing** (xUnit), code-quality checks (SonarQube), and release quality checks.
- Supported **AWS operational workflows**, investigated production EHR issues, took part in code reviews (Gerrit), and delivered interface improvements with the team.

Associate Software Engineer – Intern | Greenway Health

Feb 2025 – Jul 2025

- Five-month healthcare IT internship covering C#/.NET, web technologies, databases, cloud concepts, and Agile development; led a five-member intern group during the Dev Academy.

PROJECTS

Novare Notifications | Greenway Health | C#, .NET, REST APIs

Jul 2026 – Sep 2026

- Delivered a provider-facing notification and task center from a PRD and UI references, including task creation and assignment, provider- and priority-based views (Assigned to Me, high-priority unassigned), and duplicate-task detection.
- Built REST endpoints for other teams to create tasks automatically for defined clinical and application scenarios. Used AI-assisted development with review and validation of the output.

Clinical Editor Autosave Reliability | Greenway Health | C#, .NET

Feb 2026 – Mar 2026

- Implemented autosave after 2 seconds of inactivity, every 15 seconds during editing, and on exit, reducing manual saves and the risk of losing entered text.

Recording Page Performance Optimization | Greenway Health | C#, .NET

Apr 2026 – May 2026

- Improved responsiveness by about 1 second through local caching of templates, sections, and language selections, with refresh handling for missing or updated data.

KrishiMitra | Personal Project | GitHub

Aug 2026 – Present

Blazor Server, ASP.NET Core, EF Core, SQLite, Swagger

- Built a Kannada-first farming companion for arecanut farmers with farm profiles, activity and expense tracking, reminders, agricultural reference material, and Kannada/English Q&A.
- Structured into Web, API, Core, and Infrastructure layers with validated CRUD workflows, EF Core migrations, seeded demo data, and keyword-based Q&A supporting mock and OpenAI-compatible chat providers.

Route Optimization | Dayananda Sagar University | GitHub

Sep 2024 – Jan 2025

Python, Machine Learning, Satellite Imagery

- Classified terrain from satellite imagery with machine learning, generated cost maps of construction difficulty, and applied pathfinding algorithms to identify least-cost, lower-impact road routes.

TECHNICAL SKILLS

Languages: C#, Java, Python, SQL

Backend: .NET, ASP.NET Core, Blazor Server, REST APIs, Entity Framework Core, Microservice Architecture

Data & Cloud: SQL, MySQL, SQLite, DynamoDB, AWS

Testing & Tools: xUnit, SonarQube, Visual Studio, Git, Gerrit, Swagger

AI-Assisted Dev: GitHub Copilot, Claude, ChatGPT (with manual review and validation)

Domain: Healthcare IT, Electronic Health Records (EHR)

CERTIFICATIONS

AWS Academy Graduate – AWS Academy Cloud Foundations | Data Structures and Backend with Java (Coursera) |

Google Cloud Computing Foundations (NPTEL, 2024)

EDUCATION

B.Tech in Computer Science and Technology | Dayananda Sagar University | 2025 | CGPA: 8.47

Pre-University | MES PU College, Sirsi, Karnataka | 2021 | 96.66%
